

FULL STACK DEVELOPER AND SYSTEMS ENGINEER

PROFILE INFO

I am a web and Java application developer with a strong background in Systems Engineering. I completed my degree at Universidad Mariano Gálvez and specialize in creating customized solutions for small businesses. My expertise includes web development, programming, computer systems, research methodology, analytical skills, teamwork, and mathematical abilities. I also have extensive knowledge in web technologies like JavaScript, HTML5, CSS3, Bootstrap, MySQL, and Others. I am experienced in professional development practices, software documentation, team leadership, SEO-friendly website structuring, responsive design, and creating user-friendly interfaces.
